

# Digital Performance Audit

## Exclusively for: Agnini Family Dental

Domain: agninidental.com

Date: February 06, 2026

METRIC	STATUS	SCORE	IMPACT
Mobile Speed	■ POOR	28/100	Critical (Most users are mobile)
Desktop Speed	■ NEEDS WORK	62/100	Important for office users
SEO / Visibility	■ GOOD	88/100	Determines search ranking

### ■ PageSpeed Evidence

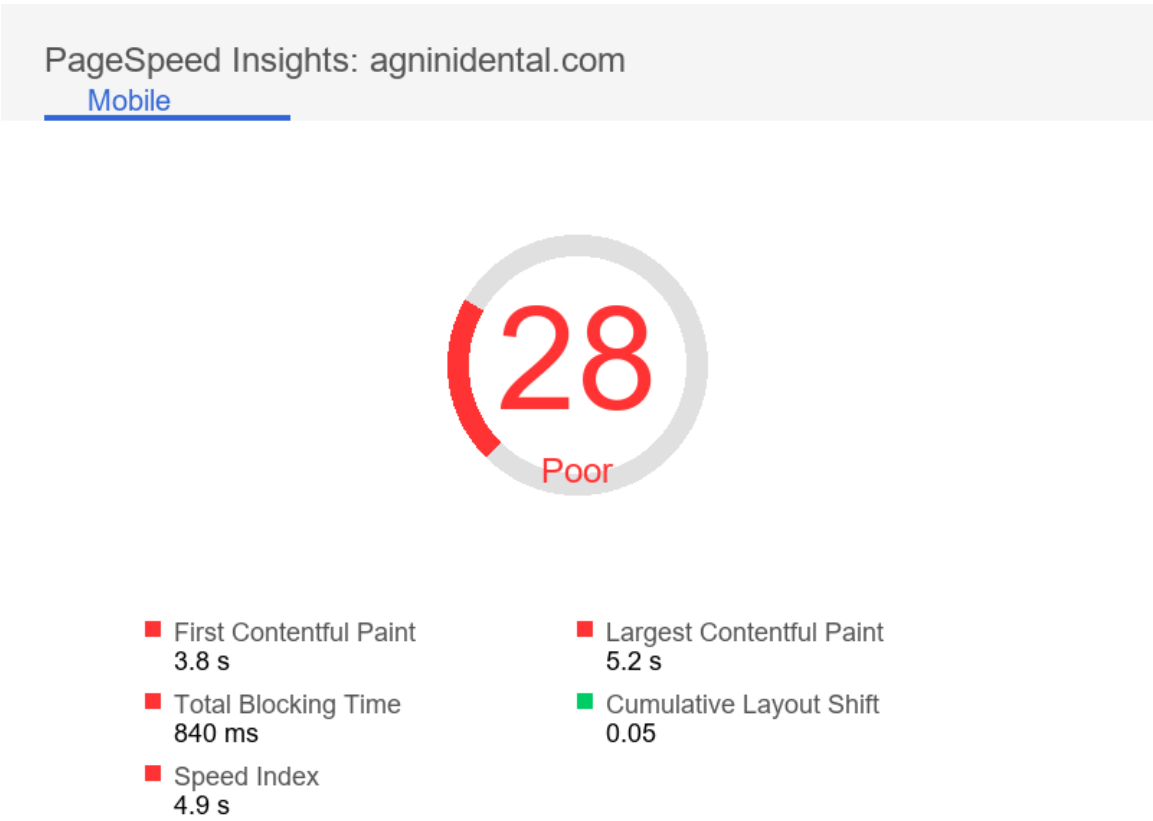

Fig 1. Actual PageSpeed dashboard showing standard Speed Index metrics.

### Detailed Findings

### ■ **Mobile Experience Hazard:**

Your mobile speed score of 28 is in the CRITICAL range. Google penalizes sites specifically for this metric. Most patient/client searches happen on mobile devices, meaning you are likely losing traffic to faster local competitors.

### ■ **Desktop Performance:**

Your desktop score of 62 suggests unoptimized images or code bloat. While less critical than mobile, it affects professional credibility.

## Recommended Action Plan

1. **Speed Optimization:** Compress images and defer unused JavaScript to boost mobile score above 50.
2. **Intelligent Intake:** Implement 24/7 AI lead capture to ensure no opportunities are missing during off-hours.
3. **Legal Compliance Update:** We will install the mandatory privacy policy pages to protect your business from new FDBR fines.

■ **VALUE OF FREE OFFER:** Typically, this optimization package (Speed Fix + Compliance Update) costs \$499. Waived completely for this initial audit to demonstrate value.
